About **RKDF University Ranchi**

It was in the year 2018, Dr. Sunil Kapoor, the founder decided to fulfill his dream of establishing an institute for quality education to the people and the region & beyond initiated “Ayushmati Education and Social Society” trust in an attempt to make the holy city of Ranchi, a recognized destination for knowledge seekers from different spheres of life and strive to become one of the best Universities in Jharkhand. This is what led to the foundation of a milestone at the karmabhoomi of the versatile and sagacious Bhagwan Birsa Munda. RKDF group has been actively involved with social causes since its very inception and has drawn appreciation from one and all for its works in various facets of societal paradigms. The Group started its journey in 1994 by establishing 1st private engineering college at Bhopal, Madhya Pradesh. Now the group has 162 institutions & 6 universities (Five in Madhya Pradesh and one in Jharkhand). The six universities and social society established by Ayushmati Education are RKDF University, Bhopal (2011), Sri Satya Sai University of Technology & Medical Science, Sehore (2014), Sarvepalli Radhakrishna University, Bhopal (2015), Dr. A.P.J. Abdul Kalam University, Indore (2016), Bhabha University, Bhopal (2018), RKDF University, Ranchi (2018). RKDF Ranchi is a highly prestigious government recognized university established under the Jharkhand Govt. Act & registered under UGC 2f 1956. RKDF University, Ranchi is a recognized member of AIU (Association of Indian Universities) and has publication house, named IJHESM (International Journal of Humanities, Engineering, and Science & Management) with an impact factor of SJIF-5.81.

About the **Departments...**

The **Institute of Pharmaceutical Sciences** at RKDF University Ranchi prepares students for successful careers in the pharmaceutical industries, fostering a strong foundation in both traditional and emerging disciplines within the field of Pharmaceuticals. The faculty is likely to emphasize hands-on practical training, research projects, and collaboration with industries or research institutions to provide students with a well-rounded education. The university's commitment to fostering a conducive learning environment, along with experienced faculty members and state-of-the-art facilities, is contributing to the overall academic experience for students pursuing studies in Pharmaceutical Sciences.

The **Faculty of Life Sciences** offers diverse programs covering areas such as Zoology, Botany, Biochemistry, Microbiology Biotechnology, and related disciplines. The faculty is likely to emphasize hands-on practical training, research projects, and collaboration with industries or research institutions to provide students with a well-rounded education in life sciences. The university's commitment to fostering a conducive learning environment, along with experienced faculty members and state-of-the-art facilities, is contributing to the overall academic experience for students pursuing studies in life sciences. The Dept. of Life Science, RKDF University, Ranchi also received a sponsored project from Central Coal Fields Limited; Ranchi (A Mini Ratna Govt. Undertaking) entitled "Treating the Infected Trees with the Help of Tree Ambulance". The purpose behind this unique initiative is to treat infected trees and plants. So, under the initiative, which is one of its kinds, we not only plant trees but also ensure that the trees are being taken care of.

The **Faculty of Engineering** aim is to address the world's most pressing challenges with science and technology. To achieve this aim, the department collaborates with other disciplines, institutions, companies and entrepreneurs and adopts an integrated approach to research and teaching. The department imparts practical insights to the students through well equipped state-of-art laboratories, Industrial visits and value addition courses. Engineering department offered Diploma, B.Tech. and PhD degree programmers in Mechanical, Civil, Mining Computer Science and Electrical and Electronics Engineering.

The **Faculty of Basic Science** was founded in the year 2018 and since then it has steadily developed into a leading Centre of research and teaching in RKDF University Ranchi. Students can pursue Chemistry, Physics, Mathematics and specialized courses like Applied Chemistry, Applied Physics, Applied mathematics. The department also caters to diverse fields, offerings Bachelor of Science, and Master's programs with a commitment to excellence in education and research.

About the Conference...

The National Conference on **SymbioSphere 2025: Recent Advances in Sciences and Technology Towards Sustainable Environment and Healthcare** is a significant academic platform designed to explore the latest innovations and research in life and pharmaceutical sciences. The conference aims to foster interdisciplinary collaboration between researchers, academicians, professionals, and students, providing them with a forum to exchange ideas and insights into the current advancements in these fields. It covers a broad range of topics including drug discovery, medical biotechnology, disease management, clinical research, and emerging trends in healthcare.

Participants engage in discussions about the impact of new technologies and scientific breakthroughs on public health, focusing on how these advancements contribute to better disease prevention, effective treatments, and overall well-being. The conference also addresses pressing challenges in the pharmaceutical industry, such as drug resistance, the development of personalized medicine, and innovations in biotechnology.

By facilitating the exchange of knowledge and promoting networking opportunities, this conference plays a key role in shaping future research directions and strategies for improving human health. It emphasizes the importance of scientific progress in tackling global health challenges and aims to inspire innovative solutions that can lead to a healthier and more sustainable future.

Sub Themes / Thrust Areas...

- AI-Driven Drug Discovery
- Pharmacogenomics and Personalized Drug Treatments
- mRNA Vaccines and Future Prospects
- Green Chemistry in Pharmaceutical Development
- Advances in Vaccine Technologies
- Nanotechnology in Drug Discover & Development
- AI-Assisted Diagnostics in Primary Care
- Bioengineering Solutions for Chronic Diseases
- Neuro Pharmacology and Novel Treatments for Neurodegenerative Diseases
- Advances in Genomic Medicine
- Personalized Medicine and Precision Therapies
- Breakthroughs in Stem Cell Research
- Synthetic Biology for Health Solutions
- Novel Biomaterials for Implants and Prosthetics
- Advanced Biomaterials for Wound Healing
- Neuroscience Breakthroughs in Brain-Computer Interfaces
- Telemedicine and Remote Patient Monitoring
- Digital Tools for Mental Health Management
- Biodiversity and Emerging Infectious Diseases
- Environmental Engineering
- Waste to Energy
- Environmental Toxicology and Human Health
- Ecosystem Restoration and Its Role in Health
- Environmental Education for Health Awareness
- Green Concrete
- Sustainable Construction
- Wearable Health Monitoring Devices
- AI in Medical Imaging and Diagnostics
- Innovations in Robotic Surgery
- 3D Printing in Biomedical Engineering
- Advanced Hydrogels in Regenerative Medicine
- The Future of AI in Surgical Robotics
- Smart Sensors for Health Monitoring
- Artificial Organs and Tissue Printing
- Advanced Robotics for Rehabilitation
- Energy-Efficient Medical Devices for Resource-Limited Settings
- Smart Materials for Medical Applications
- Digital Health Tools for Pandemic Preparedness
